

ZEBULON INNOVATIONS APPOINTS NEW CNG & LPG INSTALLER AND DEALER IN GRAIN VALLEY, MISSOURI

- Installer is the Midwest Leader and Expert in the CNG/LPG Conversion Industry -

DES MOINES, IA — October 6, 2014 — Zebulon Innovations, the Exclusive North American Distributor of Zavoli compressed natural gas (CNG) and liquid propane gas (LPG) conversion systems today announced the appointment of Oak Grove, Missouri-based Fuel Conversion Solutions as an authorized dealer/installer of Zavoli's bi-fuel CNG and LPG conversion systems.

“The addition of FCS to Zebulon’s dealer/Installer network of North American conversion centers provides us one of the top conversion centers in the U.S. Zebulon has been interested in adding FCS as a dealer/installer for Zavoli’s CNG conversion kits for some time and not until the FCS team used the kit, and most specifically the software, first-hand were they interested. FCS is an IMPCO Technologies dealer as well which provides a natural fit in them picking up the Zavoli CNG/LPG after-market kit. Zavoli and IMPCO are sister companies and share several components. FCS have conversion centers in five states and they are rapidly expanding their service and consulting footprint. “We are fortunate to have them as a key member of the installation and dealer network for the Zavoli CNG/LPG conversion kits,” said Lee Nelson, Chief Technology Officer of Zebulon Innovations.

Lanny Wagoner, Vice President of FCS noted that “The FCS team had been solely focused on the new OEM CNG conversion market, but had several requests for CNG conversions for the after-market. Once we gained insight and experience with Zavoli’s EPA Approved conversion kits, we were keenly interested to pick-up the Zavoli product – it’s easy to install and the software is a breeze to calibrate. It is a top quality kit.”

Zebulon Innovations is accelerating its conversion dealer/installer network throughout the United States and Canada since receiving numerous EPA approval for Zavoli's conversion kit technology for the widely operated line of vehicle types. The company expects to obtain EPA approval for additional engine groups to address the anticipated increasing demand from fleets that desire to operate on either CNG or LPG.

About Fuel Conversion Solutions

Fuel Conversion Solutions is located in Grain Valley, Missouri just east of Kansas City. FCS provides vehciel conversions to customers throughout the Midwest including Missouri, Kansas, Nebraska, Iowa and Oklahoma and provide CNG training across the U.S. FCS is committed to providing cost-effective solutions that enable its customers to utilize clean, American fuels in their vehicles.
