

## ZEBULON INNOVATIONS HELPS NEW WAY™ FINDS NEW WAYS TO KEEP DRIVING ON INTO NEW INNOVATIONS

- Scranton Manufacturing Company's New Way Innovates with CNG -

DES MOINES, IA — October 15, 2013 — Zebulon Innovations announced that it has sold and installed two CNG compressor units at Scranton Manufacturing Co's New Way headquarters to refuel its garbage trucks with CNG. The compressors, the Big Q and Small Q models, are manufactured by BRC Fuelmaker of which Zebulon is a national distributor.

New Way has been selling garbage trucks equipped with CNG (Compressed Natural Gas) engines to improve air quality in communities across the nation. While many consumers have yet to consider filling up with CNG, a cleaner, low cost domestic fuel, fleet operators across the United States are asking how they can leverage CNG to reduce expenses, cut emissions, and promote U.S. energy independence. While there are only 1,100 natural gas fueling stations in the United States today, that number is growing at a faster pace each year. For now, the companies that build compressed natural gas and liquefied natural gas stations are focusing on areas where natural gas can do the most good: in densely populated regions and along major thoroughfares where everyone from taxi drivers to transit authorities, truckers and couriers drives mile after mile.

"Some of the fastest growing areas of CNG infrastructure (private or public CNG stations) has been densely populated metropolitan areas and most certainly the refuse industry," reports Lee Nelson, Zebulon Innovations' Chief Technology Officer. Some 75% of all new refuse trucks are equipped to operate on alternative fuels and we applaud the innovative and aggressive approach of New Way to embrace CNG as their choice of vehicle fuel.

### **About Scranton Manufacturing Company and New Way**

Scranton Manufacturing Co was founded in 1971. Its New Way products offer a full line of affordable refuse equipment. New Way has become America's fastest growing manufacturer in the waste industry. An innovator and steward for a green economy, New Way has embraced the use of alternative fuel technologies, specifically using CNG as a cleaner, cost effective domestic fuel. New Way has expanded to sell units internationally and have two Joint Ventures with China.
