

ZEBULON INNOVATIONS APPOINTS NEW CNG & LPG INSTALLER AND DEALER IN WEST DES MOINES, IOWA

- Installer converts its own fleet to CNG, installs its own CNG refueling unit and converts CNG fleets -

DES MOINES, IA — September 24, 2013 — Zebulon Innovations, the Exclusive North American Distributor of Zavoli compressed natural gas (CNG) and liquid propane gas (LPG) conversion systems today announced the appointment of West Des Moines-based Westside Auto Pros as an authorized installation center of Zavoli's bi-fuel CNG and LPG conversion systems.

Zebulon Innovations also said that Westside Auto Pros will purchase CNG conversion kits for its fleet of service vehicles that it uses for its customers at the auto repair shop, as well as perform engine conversions for customers that utilize Westside Auto Pros affiliated fleet maintenance operation. The internal fleet includes five vehicles that will be converted to operate on CNG as well as the installation of a CNG BRC Small Q Compressor for refueling.

"The addition of Westside Auto Pros, as our first dealer/installer in our network of North American conversion partners, provides a two-pronged growth opportunity, with Westside Auto Pros being an end-user and also a sales and installation partner in a region with much pent-up demand for CNG and LPG conversion kits. We applaud the decision by Westside Auto Pros to aggressively enter the CNG and LPG conversion kit market to retrofit U.S. automobiles to operate on North America's cleaner burning, lower cost, domestic fuel" said Lee Nelson, Chief Technology Officer of Zebulon Innovations.

Zebulon Innovations is accelerating its conversion dealer/installer network throughout the United States and Canada since receiving numerous EPA approval for Zavoli's conversion kit technology for the widely operated line of vehicle types. The company expects to obtain EPA approval for additional engine groups to address the anticipated increasing demand from fleets that desire to operate on either CNG or LPG.

Ron Haugen, President of Westside Auto Pros noted that "Zavoli CNG conversion technology offers a projected payback on investment of less than two years – a huge benefit for companies looking to save money in fuel and maintenance with their high mileage fleets. In addition to the the CNG vehicle conversion kits, Westside Auto Pros has installed a BRC Small Q refueling unit which allows us to fill our vehicles for \$0.80 per GGE (gas gallon equivalent), yes 80 cents a gallon!"

About Westside Auto Pros
